TO WHOM IT MAY CONCERN:

Alex is a developer and an entrepreneur; he is also a co-founder of an android application designed for event organizers to find sponsors called "Funder".

His enthusiasm for machine learning has driven him to explore more about computer vision. It encourages him to read more articles and attend more online courses in equipping him to be a better artificial intelligence engineer. He studies Information and Technology in Universitas Komputer Indonesia. During his studies, Alex is also one of the Developer Student Clubs Leads, leading more than 80 young developers in Universitas Komputer Indonesia, and with the help of 7 core team members, this club ensures that each of the members can grow in their hard and soft skills. Alex also works as a project manager in several professional projects, and sometimes also the UI/UX designer.

Apart from the coding world, Alex is also a professional designer. He has done various projects with small to large companies in Indonesia. He also has experience in producing photoshoots, graphic designs, video promotions, and motion graphics. He has been doing these since high school.

When he isn't glued to a computer screen, Alex enjoys reading books, running with his dog, singing, and playing the guitar. You can reach him at lexms@funderasia.com or visit his website lexmanuel.com

My Previous Works and Projects

While still in college Alex do several part-time works and sometimes collaborating with other people
